Vol 14 2124 is interview with right-Harvey Edward Lehmeyer on 4/23/68. Of not in appeals file, copy not

19 2167 Dozen prisoners quoted on Ray as potentially dangerous / psychopaths almost any thing & fairly large number offering phony info for special (merit) action). Also one says Ray had running headlines - false

2184 Ray appointed attic - long article by prisoners who knew Ray, say he was framed on McPherson charge & other offenses as harm after sentencing.

(On Dissertation there is the beginning of a number of Bureau directives saying that Ray is the assassin but may leads should be followed if they could point to others with him - conspiracy with him the assassin

2243 The FBI was not satisfied with its ~~that~~ interviews with John Ray so it decided to put him out of business (quoted) "after being directed toward developing legal pretext violation to serve as lever to gain cooperation"

20-2322 Hester report 4/8-17/68
Interviews with prisoners have Stephens interviewing Stephens & various ones interrogated in each other. They say, many of them drunks or otherwise not useful as witnesses. Virtually no support for official account of crime?

days he spelled grey books. From 200 ft away – he shot four times, 6 flag? (almost all entrances place not from Depository & from pushbuttons)

No reference to Invaders meant to instill a ☆ protection. No interplay with Kyles & Mercy Dies – not one of pros – by this date – 2 weeks after crime.

Campbell reads (pp 67 ff) Has Lampe saying this accords with & denies parts of Bernard Finley's story impossible as is also Julius L Graham's. But Graham's story is consistent with pkg dropped before shot.

Eric Hosty: Shrouded not interviewed for 2 days? Right Rep rearranged & marked at Depository Had he taken longer to get to pkg at Depository Dallas Police Dallchity. Ferdon plays Woodcock by Shrouds but Knowledge of Sheriff's log not Dave's 1st Oswald time. Shrouds says he discovered" pkg in "no more than" 2–3 minutes

Dallchity Jobs: If Hoffman not openly make copy of details for use in writing file in which he does say (Dallas Police Department where Lampe could hide) to the unpossible account that has him not Shrouds finding the pkg. FBI were engaged in working up the case but unrelated report 4/11?

Stanley for writing file copies of Chas. E. Stone, Geo W. Loennecke, Barney Wright Wm B. King Wm. B. Gross, & "Those in vicinity" and "Persons at prin's grill" Dr Cass, etc

Stone has shot from pkg bet Loennecke has flag running to his left, went to main St Saw no motion or cars or running, Knight – 4 men ran left. Ring – Spring on Mrk, shot from Dos left Gross – pack bet eyes open.

86 Opens with more on Atlanta Nest of 3 who left Acme. "Ralph" amended after 6060 is on part of Lee Payne's stories, cannot have been intended to mislead Hq (as of 2/2/76) but undoubtedly did make misleading record in FBHQ to flesh in Dept - when assigning this MFO TT is the latest truth. Says it had only 5 "extremist" informants / a dubious if not prejudicial description of the civil rights movement and the black clergy) one in Memphis.

It does not say the Mfo used PSIs, CIs & PCIs but had full access to all the MPIs & their work.

"confessions" But SCLC use of murders as grade Marshals & attributes this to "services rendered to" MFO. Like its own old files. And those of Hq. and how many "sources" did it have? Many.

See below When the FBI generates this kind of record does it not ever be taken? This was after this case was in court.

6079 on 2d Lee Payne story. No CRD interest. (But how big it became in CR right!) Claims these informers not involved in the violence. Does it say he did not participate in instituting it?

Now they say they had "five informants providing coverage on the marchers". This means formal, paid, & numbered informants. They had more "unpaid" "sources" + the CIs & PCIs. But by their own figures this was in a ratio of 1 to 3, the Klan being about 75 members of the murders only.

The purpose becomes clear - Attached Hq. ltr. to [illegible] "Where they say evidence was" instrumental "in charges" 57 return to Memphis, they might show it is only reason 6106 on why sent photos - They cooked up phoney plant - all the photos are referred to in Hq file. This phoney is because Newsman swore falsely after the search & because the FBI got Doj to tell court with Doj judge

"Bulky" FBI's exhibits & archaeological work went into great & elaborate detail on the unnecessary & the irrelevant, as if the telephone towers there was no reason to connect with Ray, but labeled such markings as: A sketch of the balcony on which Ray crossed and my FBI angle from the street & from the flophouse. This has importance in case of the Lane pictures, esp. of the point my colleagues and I in the WC felt uneasy about the origin of the shot. No sketch showing the rifle could have got inside the bathroom from the conjectured point at which the map is conjectured to

how left a "margin" mark. Especially at the projected angle, would more of the wing have left the space? If so - and the answer is no - not enough - could there have had a bottom on the object? Again no not possible, which explains the F-35's design. Why it couldn't have made the front the pointed tip was not lost on them. Or is the certainty of impossibility only that explains the "obscuring"?

If the wing had been cut out the building of model have been easy.

Upon seeing it all the way at this is the 1st time I've seen the full size of the pinhouse design of Mrs Stacy the Pentagon envoy. So there is no representation that might glance, hedge that would have perverted it, together with the bend in mark at the nose front, away from the wing of vision. Nor is this in the markings of the plane of the wing. All the materials like used the manufacturers data on the OV-25 Silver Spur Luminaire street lighting fixtures each of 400 watts - was relevant to nothing. Like me in the top and drawings. But the tree keep shapes on yet.

The FBI's pictures of the scale model also show these "omissions".

Sanitation Workers file #157-9146 Serials ~~X-X6~~ 93 pp. Picture with very little on Memphis Sanitation files

Add to a use on ch. on Strike summary at top of typed notes

First date in file is 2/16/68 By 2/20, X3, the FBI was trying to make it a Communist deal & immediately became a domestic intelligence operation the scope of which is not ~~disclosed~~ in 93 pp. By 2/20/68, on eve Lorraine was delivering inflammatory speech alluded to ~~some~~ in the report, X16. He refers the response a Memphis undercover policeman at a public meeting - and that he was not hurt. This seems to be withholding of names in a historic case on the charge of demonstrable harm - and on the withholding of police & FBI names in general. There are a number of such cases of response & no report of any harm. ~~in this instance~~

There is a gap ~~from~~ There reads from 3/17/68 ~~from~~ to 4/3/68 which skips the assassination and what led to it. The assassination was 4/4/68 Serial numbers were started after the strike was settled & that was in reaction to the killing.

The FBI is also deficient in failing to report why the strike was not settled prior to the assassination. The reason would appear to be that if the strike had been settled King would not have been in Memphis to be killed there.
